About

With accessibility and usability in mind, I specialize in translating designs into scalable and maintainable code. Prioritizing browser-native behavior, I use semantic HTML, modular CSS, and lightweight JS to build experiences that empower and delight users.

Experience

Senior User Experience Developer at Zotec Partners

3/2024 - Present

- Leading front-end development of a medical billing application handling over 120 million claims annually
- Consulting with designers and stakeholders, informing approach, and guiding best practices
- Architectural decision-making focused on ensuring code is accessible, maintainable, and robustly tested
- Training team members on front-end approaches, usability, and Angular best practices

Senior User Experience Developer at Kajabi

6/2022 - 4/2023

- Spearheaded the development, implementation, and maintenance of a new StencilJS component library with an emphasis on improving interoperability, accessibility, and scalability
- Constructed, refined, and tested React component library with a focus on backward compatibility
- Established and documented accessibility, semantics, and performance best practices
- Triaged, managed, and resolved component library support requests

Senior User Experience Developer at DockYard

9/2016 - 6/2022

- Lead UX development of web apps and component libraries with companies such as Apple and Netflix
- Collaborated with Design and Engineering team members to translate designs into semantic, reliable code
- Wrote and audited code to ensure accessibility, performance, and graceful degradation
- Defined and refined code standards, to enhance company understanding of UX best practices and maintain consistent code solutions between developers
- Mentored colleagues seeking to improve their UX, accessibility, and remote work skills
- Implemented inclusive hiring practices to reduce bias
- Co-worked remotely with a distributed team while actively fostering culture and engagement

Skills

- HTML and CSS expertise with a specific focus on semantic, accessible, responsive, mobile-first code
- Front-End JavaScript, TypeScript, Angular, StencilJS, and SCSS
- SaaS product development
- Experience with test and coverage suites
- Robust understanding of accessibility and WCAG best practices
- Expertise in building, maintaining, and scaling complex web applications, design systems, and component libraries
- Modern design software experience
- Years of remote work experience
- Experience using AI tooling as part of development cycle

Education

BS, Web and Interactive Media

- Pennsylvania College of Technology
- The Art Institute of New England

Certificate of Completion

- Center for Technology, Essex
